

## **GMO Policy**

Breckenholme Trading Company (B.T.C.) believes that we have a responsibility to care for and protect the environment in which we live and operate. We are fully committed to improving our environmental performance across all our business activities and will encourage our suppliers to do the same.

Genetically Modified Crops are plants used in agriculture, the DNA of which has been modified using genetic engineering techniques. In most cases the aim is to introduce a new trait to the plant which does not occur naturally in the species. We at BTC purchase our ingredients in order to produce our products to the highest standards and only source ingredients that are GM free because we, as many of our consumers, are uncertain of their safety.

Additionally it is not our intention to introduce such ingredients at any time in the future.

This policy statement is subject to ongoing review and any change to this policy statement would be mindful of both the law and our customers concerns.

Signed

Ben Palmer  
Director BTC
